

Velocity

Technology **is now part of**
fiserv.

Velocity allows payments providers, in-particular payment facilitators and marketplaces; to manage transaction rating and settlement to merchants and sub-merchants.

- ▶ Transaction **processing and analysis**;
- ▶ **Funding and adjustment** handling;
- ▶ **Instructional or managed funding** request including split funding;
- ▶ **Funding settlement**; and
- ▶ Settlement **rejection & exception** management.

fiserv.

Key benefits

A comprehensive, single solution platform for transaction rating, settlement, risk management and reporting. Allowing you to focus on the offer and not the settlement platform behind it.

Supports multi-region, multi-language and multi-currency requirements.

Convert previously declined merchant profiles into those with conditional acceptance using our deposit and reserve management capability.

Responsibility and control options using both UI and API.

Integrated reporting and reconciliation features with full audit trail for compliance purposes.

Can be linked with Revolution and Prospect to deliver an entire merchant ecosystem from boarding through to money settlement.

Why technologi Worldwide Ltd?

Founded in 2015.

ISO 27001 certified.

Award-winning solutions: Revolution, Prospect, Velocity and Analytics.

Backed by Fiserv.
